Evergreen Seedlings Rooted Cuttings and Transplants

Suitable for planting out in rows for
growing into larger specimens

Leach's Nurseries
Riverton, N. J.

FEB 7 1931

Supreme Quality Always

GENERAL INFORMATION

Our nurseries are located on the Burlington Pike, 1½ miles from Riverton and 9 miles from Camden, N. J.

Prices quoted herein include parcel post or express charges prepaid to your address. Please state whether you wish your order to travel by express or parcel post.

We guarantee all stock to be true to name, to be of the size specified, and to pack the plants properly so that they will reach you in satisfactory planting condition. We give no other warranty expressed or implied.

We ship from Maine to California. Our plants please others. They will please you.

Our nurseries are open for inspection seven days a week from 7.30 a. m. until dark. Visitors are always welcome and will be shown every courtesy.

Special Prices

This list presents an unusual opportunity to those desirous of securing high-class ornamental plants in small sizes at decidedly low prices. When these plants have made a foot or two of growth they may be used in the planting of your own grounds or profitably sold to home owners in your vicinity.

PLANTING AND CULTURAL DIRECTIONS

There is no particular difficulty or mystery connected with the planting or growing of the baby evergreens which we ship to you. Prepare the ground as you would for any garden crop, if possible applying a good coating of well-rotted manure which may be plowed under or harrowed into the soil. **Do not apply any commercial fertilizer or lime**, since evergreens on the whole resent the presence of these two materials in the soil. The rows can be marked out eighteen inches apart and the plants set out in the rows at a distance of 6 to 8 inches between the plants. Plant the evergreens just as you would a cabbage plant, taking care to set them at the proper depth and **firming** the soil about the plant with the foot. If the soil is not sufficiently moist when planting it is advisable to moisten the soil around the roots. Keep the plants cultivated and free from weeds and if dry spells occur during the first growing season after planting it will pay to apply water to the soil about the roots. Early in the second spring after planting, the plants should be carefully dug with a ball of earth and transplanted at a greater distance apart so as to allow for additional growth without crowding. Any trimming designed to shape up the individual plant or to promote a dense growth of the foliage should be done in the spring before growth starts.

DESCRIPTIVE LIST—EVERGREENS

25 plants at the 100 rate, 250 at the 1,000 rate. We cannot accept any total order for less than \$4.00.

PICEA PUNGENS GLAUCA. Colorado Blue Spruce. Well known to almost everyone. Familiar silvery blue tree. Fine specimen for the lawn. We offer three year old seedlings, 4 to 6 inches high at

\$4.50 per 100 \$40.00 per 1000

Postpaid

PICEA GLAUCA ALBERTIANA. Black Hills Spruce. A dense compact spruce with steel blue foliage. Makes a splendid specimen ornamental evergreen. Two year old seedlings 2 to 3 inches high,

\$4.00 per 100 \$35.00 per 1000

Postpaid

PINUS RESINOSA. Red pine. A graceful, dense and rapid growing pine. Resistant to insects and disease. The best of the pines for ornamental planting and windbreaks. Three year seedlings, 6 to 8 inches high,

\$6.00 per 100 \$50.00 per 1000

Postpaid

TSUGA DIVERSIFOLIA. Dwarf Japanese Hemlock. Similar to our native hemlock but with smaller leaf and dense, compact growth. Desirable for lawn specimen, foundation plantings or hedges. A Japanese aristocrat. Rare. 3 year seedlings, 3 to 6 inches,

\$6.50 per 100 \$60.00 per 1000

Postpaid
